Partnership

22 **BBx Generations – Our Progression in Time**

By Nico Spence

Journey through the rich heritage of the BBx generations that began 20 years ago on the founding principle of providing a platform independent Business BASIC interpreter and database.

26 **Weaving a Training Web**

By Sam Vulopas

BASIS implements internet technology and methodologies to offer flexible and more diverse training opportunities

28 **MARK SYSTEMS – A Revenue Stream Runs Through It**

By Susan Darling

A creative pricing model not only creates recurring revenue and a dependable financial future for MARK SYSTEMS, but also gives their new customers a low-risk point of entry.

38 **Enhancing the Bouquet with BBJ – KMK Software AG**

By Denise Schmitz

With a clear idea of the wine industry's need, KMK designed and delivered a complete cross-platform state-of-the-art system that runs in BBJ.

Language/Interpreter

8 **Input Validation: Veto Power**

By Jim Douglas

This powerful 5.0 feature enables the developer to create field level validation rules, easily and directly, which eliminates the potential cascade of side effects of loss of focus-triggered validation.

13 **Super-Charged SYSGUI**

By Adam Hawthorne

A completely new rewrite of the familiar subsystem addresses and removes old limitations and brings much-anticipated functionality and significant performance improvements.

24 **Connection Pooling – Part 1**

By Jeff Ash

ODBC/JDBC Pooling BASIS data access drivers now manage the connections automatically – learn how it works and how to implement this time saving and efficient capability.

25 **Connection Pooling – Part 2**

By Mark Schnedar

License Pooling and Lingerin Added in 4.01, these features greatly improve performance in many environments with no user intervention – learn how they function and how to tune them.

Database Management

18 **The BASIS DBMS – New 5.0 Features**

By Jeff Ash

Boosted with significant power and flexibility, BBJ 5.0 introduces better interoperability with third party ODBC/JDBC applications, and easier, more flexible database administration.

Development Tools

5 **FormBuilder: BASIS IDE's Better Cross-Platform Resource Builder**

By Jon Bradley

BASIS' new single, unified environment, FormBuilder = ResBuilder + new features + Windows/Linux/Mac OS X and UNIX support!

System Administration

16 **New Install Puts You in the Driver's Seat**

By Bruce Gardner

The installation process for packaged BASIS products, now called the BASIS Product Suite, uses a single cross-platform InstallShield interface that is consistent in both appearance and functionality across all platforms.

36 **Taking Out The Garbage**

By Mark Schnedar

Less garbage, collected less frequently, leaves more time for BBJ programs to run faster, especially when accessing the BASIS DBMS.
