

TABLE OF CONTENTS

Partnership

- 6 OSI Solidifies OSAS Investment with BBJ**
By Susan Darling
Solid business planning helped shape and direct Open Systems Inc.'s BBJ future.
- 8 With BASIS, Denver Computer Still a Mile High**
By Randy MacLeod
Faced with the demise of their Business BASIC language provider, Denver Computer migrated their business application to BASIS technology.

Language/Interpreter

- 16 Grid to Order**
By David Wallwork
This most anticipated BBJ 6.0 enhancement offers programmer productivity gains by incorporating versatile methods for sorting data with the BBJStandardGrid object.
- 24 Safe and Retrievable Intellectual Property**
By Adam Hawthorne
The new CLEARP and enhanced SAVEP verbs provide a safe and dependable way to retain original code, perform unrestricted maintenance, and prevent unauthorized access to your intellectual property.

Database Management

- 14 PDF Now Also Means Perfectly Displayed Forms**
By Chris Hardekopf
The newly extended BBJForm API can now create PDF output directly from BBJ, giving BBJ programmers a new and useful tool.
- 30 OpenOffice.org – a Sweet New Suite**
By Jeff Ash
Deploy a set of office applications across a variety of operating systems while accessing data stored in BBJ data files...for free.
- 32 VKEYED Files – New Features for a New File Type**
By Chris Hardekopf
This new file type for variable length records, ideal for storing images and video clips in BLOBs, optimizes storage requirements while allowing for dynamic addition and deletion of keys and giving programmatic access to embedded string template information.

Development Tools

- 9 Tuning the Performance Analyzer**
By Jim Douglas
How BASIS enhanced the Performance Analyzer by using it on itself while enhancing the tool with additional features.
- 18 The State of the IDE**
By Nick Decker and Mike Phelps
A sneak peek at some of the ambitious BBJ 6.0 enhancements to the IDE and those planned for the future, including a new comprehensive GUI development tool and more convenient ways to debug legacy code.

System Administration

- 26 Choices, Choices, Choices**
By Brian Hipple
A simplified look at the many deployment choices for BASIS products including one-, two-, and three-tiered configurations.
- 34 The Response File Responds Silently**
By Nick Decker
BBJ 5.0's new and powerful mechanism offers greater flexibility and more options that provide for total customization of the entire silent installation.

COLUMNS

- 27 QA Memos Web Service** — *By Brian Hipple*
BASIS practices what they preach – BASIS discusses how to provide Web services and shares the know-how by giving developers access to the source code for the QA Memos Database Web service provider program and the client-side consumption program.

- 39 The Extreme Web Makeover** — *By Greg Smith*
SCO Forum in Las Vegas — *By Laurence Guiney*

- 40 Lock, Lock, Who's Got the Lock?** — *By Janet Smith*
