

How to - Set up Addon Version 6 Data Dictionary

- Contact BASIS to get the .zip file containing the Version 6 DD files and programs.
- Copy the ADATA/DD* files to your ADATA directory.
- Copy the 61DD/DD* programs into your ADM directory.
- Launch V6 Addon, go to the SYM menu, and run System Description Maintenance
- Call up the DD record and set the installed flag to "Yes," and verify the correct data and program paths.

```
ADD+ON Software Advantage/V For Windows (T0)
Settings Edit Print Help
----- ADD+ON Manufacturing Company ----- ADD+ON Software v6.0.0
SYM.DA System Description Maintenance      01/21/14 02:52 PM T0 PF

System ID: DD
Description: Data Dictionary
Multiple Firm: Y
Default Firm: 01 ADD+ON Manufacturing Company
Data Path: ./aon/ADATA
Program Path: ./aon/ADM
Post To GL: N
Batch Entry: N
