Mining the Future with Diamond 725

BASIS International Ltd. and EMS Healthcare Informatics co-hosted the Diamond Work Group Conference in Albuquerque immediately following the Albuquerque International Balloon Fiesta. The timing of this conference in early October afforded some of the attendees the opportunity to arrive a day or two early to enjoy this world famous event. This year's Fiesta was one of the best, with great weather and over 500 balloons for spectators to enjoy and photograph, some with amazing shapes.

The theme for this conference was "Planning for the Future with Diamond® 725" with the goal to work, learn, collaborate, and network as a group. And work, learn, collaborate we did, with a productive two-day exchange that resulted in much collaborative work for BASIS and EMS to complete in the coming months. Together, we addressed application changes necessary for today's healthcare requirements, enhancements that BASIS technology provides, and a top-to-bottom support model that provides Diamond users with a secure future.

Keeping up with the healthcare industry regulatory changes, security and data exchange requirements, and technology choices is a very tall order for customers running on BASIS technology. Attendees discovered that BBJ provides the

necessary tools and features to get the job done, today and far into the future. User groups like the Diamond Work Group Conference provide the opportunity for peers and technology providers to come together and help each other stay abreast of the ever-changing industry.

BASIS welcomes the opportunity to partner with resellers and users, and to participate in strategy sessions and technology reviews. Such a partnership helps to grow and nurture successful businesses running on BASIS technology. BASIS also provides professional services to jump start your BBJ and Barista projects. The BASIS business development team stands ready to strategize with and assist any of our partners with their Business opportunities. Call BASIS Sales for assistance in any of these areas. ■
